

56521-3Q000 Steering Rack Bushing For KIA HYUNDAI SANTA FEA 2002-2018 SONATA 2009-2017

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 56521-3Q000
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Payment Terms: D/P, L/C, T/T

Product Specification

- Product Name: Steering Rack Bushing
- Materials: Rubber
- Size: Standard
- Warranty: 12 Months
- Highlight: 56521-3Q000 Steering Rack Bushing,
SONATA 2009 Steering Rack Bushing

Product Description

Product Description:

A steering rack bushing is a vital part of a car's steering system. It is specifically situated within the steering rack, which is responsible for translating the rotational movement of the steering wheel into the necessary linear motion to turn the wheels. The main function of a steering rack bushing is to provide support for the steering rack, dampen any vibrations or noise, and ensure a seamless steering operation.

The steering rack bushing is designed to absorb any shocks or impacts that may be experienced while driving. This not only helps to protect the steering components but also contributes to the overall smoothness of the ride. The bushing also helps to reduce any noise that may be caused by the steering system, creating a quieter driving experience for the driver and passengers.

Without a properly functioning steering rack bushing, the steering system can be compromised, leading to potential safety issues while on the road. Therefore, it is essential to regularly inspect and maintain the steering rack bushing to ensure it is in top shape and able to perform its crucial role in the vehicle's steering system.

Features:

Vibration Dampening

Experience a smoother and more comfortable ride with our steering rack bushing. Designed to effectively absorb and reduce vibrations and shocks, this essential component helps to isolate the steering rack from the chassis. As a result, it minimizes the transmission of vibrations to the steering wheel, enhancing overall driving comfort.

Improved Steering Response

Maintaining proper alignment and stability of the steering system is crucial for precise control and maneuverability. Our steering rack bushing plays a vital role in achieving this by reducing play and movement in the steering rack. This results in a more direct and responsive steering feel, ensuring an enhanced driving experience.

Durability and Longevity

Constructed from high-quality materials such as rubber, our steering rack bushing is built to withstand the demands of daily driving. It is resistant to wear, tear, and degradation caused by exposure to road debris, chemicals, and weather elements. This ensures long-lasting performance and reliability for your vehicle.

Enhanced Safety

A worn or damaged steering rack bushing can compromise the safety of your vehicle. It can affect the stability and responsiveness of the steering system, increasing the risk of accidents. By replacing the bushing with our high-quality product, you can restore the integrity of the steering system and ensure optimal control, promoting a safer driving experience.

Applications:

Superior Steering Rack Bushings for Reliable Steering Performance

The steering rack bushing is a critical part of your vehicle's steering system, and its quality greatly impacts the stability and precision of your steering control. At our company, we offer top-of-the-line steering rack bushings that are designed to ensure stability, reduce vibration, and provide smooth and precise steering for your vehicle.

Our premium steering rack bushings are built to last and are an investment worth making to restore the performance and responsiveness of your vehicle's steering. With our high-quality bushing, you can experience improved control, smoother steering, and enhanced safety while driving.

When it comes to steering, durability and reliability are paramount, which is why we take great pride in the quality of our steering rack bushings. Rest assured, our bushings are built to withstand wear and tear, providing a long-lasting solution to your steering needs.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
